

Title	DDoS Life Cycle
Schedule:	September 30, 2020
Description	We will share about the practices that we do within the Security Operations Center to enlighten our audience on what is really happening day in and day out. On how a Network Security Analyst approaches an event regardless of what type of attack will be encountered. Learn from our SOC playbooks derived from our Nexusguard Certified Security Analyst (NCSA) course.
Speaker	
Mandy Tupaz	Senior Manager for Services and Security Operations for Nexusguard, has been in the industry of Network and Security Operations for almost 15 years. He was able to witness the evolution of DDoS Attacks from small and simple to complex and large DDoS Attacks. A proven frontliner who is versed in supporting the global market ensuring Online Threats are mitigated and online services will be made available.
Aurelia Budihardjo	Nexusguard Certified Security Professional from the Security Operations Center of Nexusguard. She helps on the critical cases that is being managed of the SOC team, conducts assessments on the TAP partners and lead trainer for the NCSA and NCSS courses of the Nexusguard DDOS SOC courses.
