

Title:	Why you need to Learn Linux as Network Developer? (A Teaser to Cisco NDG Linux 1 and 2 Course)
Schedule:	June 23, 2022
Speaker	
Engr. Joseph V. Era	<p>IT Consultant, Trainer, Six Sigma Green Belt, Software Architect, System Analyst</p> <p>A seasoned IT professional and consultant focusing on system analysis and design; software architect and development; and process improvement. I have more than two decades of experiences in training and leading different software developer groups using open source technologies. With experiences and gained knowledge, I have been conducting IT professional training to banks, BPOs, telecommunication, manufacturing companies and so on for more than 15 years.</p>
Topics Discussed:	Learning Linux will help you understand the foundation of networking. It will be easier to secure your network because you will have a deeper understanding of how machines communicate and how pockets of data are transported from one point to another.
