

Title:	Implementing ChatGPT in Business Operations
Schedule:	April 19, 2024 at 3:00 - 4:00pm
Speaker	
Chetan Shah	<p>A Principal/Solution/Software Architect with over 25 years of experience in the field.</p> <p>His expertise spans Generative AI, including deep dives into GPT models, natural language processing, and advanced prompt engineering techniques for AI tools like ChatGPT, Bard, and WatsonX.</p> <p>He has honed skills in automating repetitive tasks, predictive analytics with Python, and seamlessly incorporating AI capabilities into various industry workflows to boost efficiency and innovation.</p> <p>Today, he will share insights on harnessing AI's power to revolutionize your technical strategies and operational frameworks.</p>
Topics Discussed:	<ul style="list-style-type: none"> • Integrating ChatGPT: Implementation Strategies and Best Practices • Customizing ChatGPT for Business Needs • Managing and Measuring ChatGPT's Performance
Total Registration :	<p>Google = 287 pax</p> <p>Zoom = 75 pax</p>
Total Viewers:	<p>FB Live = 311 views</p>

ChatGPT 4

```

print("City: {city}, Country: {country}")
print(f" Wind Speed: {weather['wind']['speed']} m/s")
print("-----")
except KeyError:
    print(f"Failed to retrieve weather data for {city}. Please ch
if __name__ == '__main__':
    main()

```

Explanation:

- The function `'get_weather'` takes an API key and city name, constructs a request to the OpenWeatherMap API, and returns the weather data as a JSON object.
- The `'main'` function lists the cities for which the weather will
