Title:	Introduction to Python Programming
Schedule:	May 16, 2025 at 2:00 - 3:00 PM
Speaker	
Paul Kenneth Espina	Our guest speaker, Paul Kenneth Espina, is a seasoned data professional with extensive experience in both data science and analytics. He specializes in turning complex datasets into predictive models and actionable insights that support strategic decision-making. He works closely with Python, not just as a programming language, but as a key business enabler. For him, Python is a versatile tool that drives process automation, improves efficiency, and lays the groundwork for AI adoption across organizations. In today's webinar, our speaker will explore how Python can be seamlessly introduced into business environments, why it's becoming essential in today's competitive landscape, and how companies are already realizing strong returns on investment by leveraging it.
Topics Discussed:	Introduction to Python Python as a Foundation for AI Success Stories Why Companies Should Embrace Python
Total Registration :	MS Forms = 283 pax Schools(Mapua, DepEd, Universidad de Manila,University of Science and Technology of Southern Philippines,Don Honorio Ventura State University and etc.) Government(LGU Sta Maria, City Government of Navotas, GSIS, etc.) Private(RCBC, SharePro Inc., Fujifilm, Philtrust and etc.)
	Zoom= 117 pax

So, how does Python play a role?

- **Pandas** and **NumPy** for handling and manipulating data.
- **Matplotlib** and **Seaborn** for data visualization.
- **Scikit-learn** for building machine learning models.
- **TensorFlow** and **PyTorch** for deep learning and neural networks.
- **Hugging Face** for natural language processing and transformers.
